

Experiment - 2

Aim: Setting up GitHub Account

The first steps in starting with GitHub are to create an account, choose a product that fits your needs best, verify your email, set up two-factor authentication, and view your profile.

There are several types of accounts on GitHub. Every person who uses GitHub has their own user account, which can be part of multiple organisations and teams. Your user account is your identity on GitHub.com and represents you as an individual.

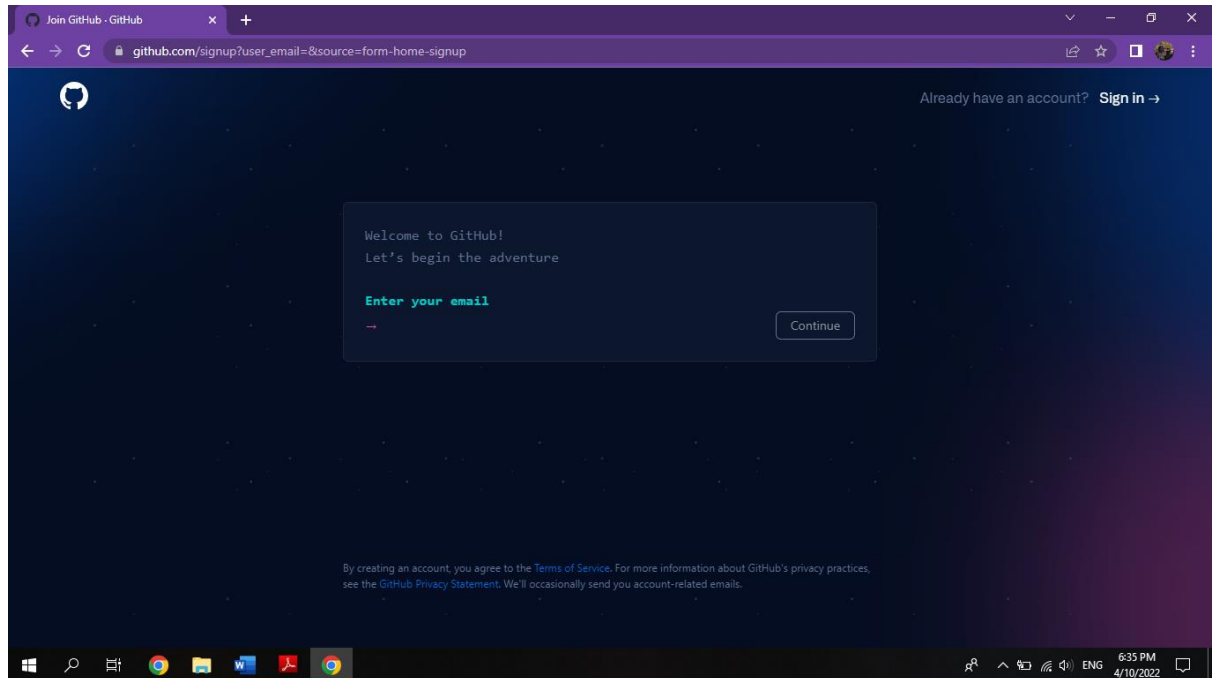

1. **Creating an account:** To sign up for an account on GitHub.com, navigate to <https://github.com/> and follow the prompts.

2. Click on Create an account if you are a new user or if you have already an account, please login.

3. After Clicking on create a new account you will be redirected to a new page where you have to enter your email id which you want to use for your account. Now enter your password you want to create for your GitHub account. After that you will be asked to enter your username.

4. Now Click on Create Account.
5. Verify it from your email and you are all set to go.
